E Reading

Read the text. Choose the correct words to complete the short summary.

The article is about food waste **in one country / in Europe / around the world**. The writer is most likely **a chef / a journalist / an accountant**.

Food waste

The average UK family throws away about 24 meals a month. That's about 4.2 million tonnes of food and drink a year. Almost half of this food goes straight from fridges or cupboards into the bin. A recent study showed that about 60% of this waste could actually have been eaten, which means the average family spends abound £470 a year on wasted food. Interestingly, the top three foods that people throw away in British homes are bread, potatoes and milk. So, what can we do about this? Ordinary families can plan their meals better. Writing a list of meals for the week can help. That way, people only buy what they need and don't throw food away.

However, it isn't only families that waste food. It is shops and food places, too. As a result, the UK government has started a campaign. They have asked producers, supermarkets and restaurants to work together to reduce food waste. In response, some supermarkets and restaurants now give food they don't sell to local charities. They are also thinking more carefully about the amount of food they keep in their shops and kitchens because ordering too much results in waste. All of this is excellent news.

However, there is a further problem with food that is wasted. Burying waste food in the ground increases the amount of greenhouse gases in the atmosphere and therefore increases the problem of global warming. This is why some local councils are using food waste from homes and businesses to produce energy. If we act now, we can protect the planet and also save billions of pounds.

Read the text. Choose the correct words to complete the short summary.

The article is about food waste **in one country / in Europe / around the world**. The writer is most likely **a chef / a journalist / an accountant**.

/ 2

Read the text again. Complete the sentences.
