You have a Microsoft 365 E5 subscription that contains two groups named Group1 and Group2. The subscription contains the users shown in the following table.

Name	Member of	Role
User1	Group1	None
User2	Group2	Global Administrator
User3	Group1, Group2	None

You create the following Conditional Access policies:
•Name: Policy1
•Users:
o Include: Group1
o Exclude: Group2
•Target resources:
o Include: All cloud apps

•Grant:
o Grant access: Require multi-factor authentication
•Session:
o Persistent browser session: Never persistent
•Name: Policy2
•Users:
o Include:
- Directory roles: Global Administrator
- Users and groups: User3
o Exclude: Group2
•Target resources:

LIVEWORKSHEETS

o Persistent browser session: Never persistent
•Name: Policy2
•Users:
o Include:
- Directory roles: Global Administrator
- Users and groups: User3
o Exclude: Group2
•Target resources:
o Include: All cloud apps
•Session:
o Sign-in frequency:
- Periodic authentication: 2 hours

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 will be prompted for the Stay signed in option when they sign in to the Microsoft 365 portal.	○	○
User2 must reauthenticate to Microsoft 365 Apps every two hours.	○	○
User3 must reauthenticate to Microsoft 365 Apps every two hours.	○	○

You have a Microsoft 365 E5 subscription that contains a Microsoft Teams team named Team1 and two Microsoft 365 groups named Group1 and Group2. The subscription contains the users shown in the following table.

Name	Member of	Role
User1	Group1	*None*
User2	Group2	*None*
User3	Group1	Global Administrator

You create an access package that has the following settings:
•Name: Package1
•Resource roles:
oTeam1: Owner
•Users who can request access: For users in your directory
oSpecific Users and Groups: Group1
•Require approval: Yes
oRequire requestor justification: No
oHow many stages: 1
oFirst Approver: Team1, User3
oRequire approver justification: Yes
•Enable new requests: Yes
•Expiration:
oAccess package assignments expire: 7 days
oUsers can request specific timeline: Yes
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

LIVEWORKSHEETS

Answer Area

Statements	Yes	No
User1 can gain access to Team1 by requesting Package1.	○	○
User2 can gain access to Team1 by requesting Package1.	○	○
User3 can approve their own request for Package1.	○	○

You have an Azure subscription named Sub1 that contains two resource groups named RG1 and RG2. Sub1 contains the users shown in the following table.

Name	Member of
User1	Group1, Group2
User2	Group2
User3	Group3

Sub1 contains the resources shown in the following table.

Name	Type	In resource group
VM1	Virtual machine	RG1
Vault1	Azure Key Vault	RG1
Vault2	Azure Key Vault	RG2

You create the role-based access control (RBAQ role assignments shown in the following table.

Role	Member of	Scope
Reader	Group1	Sub1
Key Vault Secrets User	Group2	RG2
Owner	Group3	RG1

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

LIVEWORKSHEETS

Answer Area

Statements	Yes	No
User1 can read the contents of the secrets stored in Vault1.	○	○
User2 can read the contents of the secrets stored in Vault2.	○	○
User3 can update the configuration of VM1.	○	○

You have an Azure subscription that contains a resource group named RG1. RG1 contains two virtual machines named VM1 and VM2 that have Microsoft Entra ID login enabled.

The subscription contains the users shown in the following table.

Name	Role	Role scope
User1	Virtual Machine User Login	Subscription
User2	Virtual Machine Contributor	RG1
User3	Virtual Machine Administrator Login	VM1

Which users can sign in to VM1, and which users can sign in to VM2? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

LIVEWORKSHEETS

Answer Area

VM1:

- User1 only
- User2 only
- User3 only
- User1 and User3 only
- User2 and User3 only
- User1, User2, and User3

VM2:

- User1 only
- User2 only
- User3 only
- User1 and User3 only
- User2 and User3 only
- User1, User2, and User3

Question: 237 CertyIQ

DRAG DROP

-

Your on-premises network contains an Active Directory Domain Services (AD DS) domain. The domain contains a server named Server1 that runs Windows Server and hosts a shared folder named Share1. The domain contains 500 devices that run Windows 11.

You have a Microsoft 365 E5 subscription that syncs with the domain.

From Global Secure Access, you enable the Private access profile and deploy the Global Secure Access client to all the devices.

You need to ensure that the devices can connect to Share1 remotely by using Global Secure Access.

Which three actions should you perform in sequence? To answer move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

LIVEWORKSHEETS

Actions

- Create an enterprise application.
- Create an application segment.
- Allow internet inbound traffic on TCP 443 to Server1.
- Install a connector on Server1.
- Create an app protection policy.

Answer Area

1.
2.
3.
