

Mammals Around Us

Mammals are a group of animals. Most mammals have hair or fur on their bodies. They breathe using lungs. Mammals are warm-blooded animals.

Most mammals give birth to live babies. Mother mammals feed their babies with milk. Cats, dogs, cows and elephants are examples of mammals.

Some mammals live in water. Whales and dolphins are mammals, although they live in the sea. They breathe air using lungs. They must come to the surface to breathe.

Bats are also mammals. They have hair and give birth to live babies. Bats can fly, but they are not birds. They do not have feathers.

Mammals live in many different places. They can live on land, in trees or in water. Mammals are important animals in our world.

SECTION A:

CHOOSE THE CORRECT ANSWER

Instructions: Read the passage and circle the correct answer.

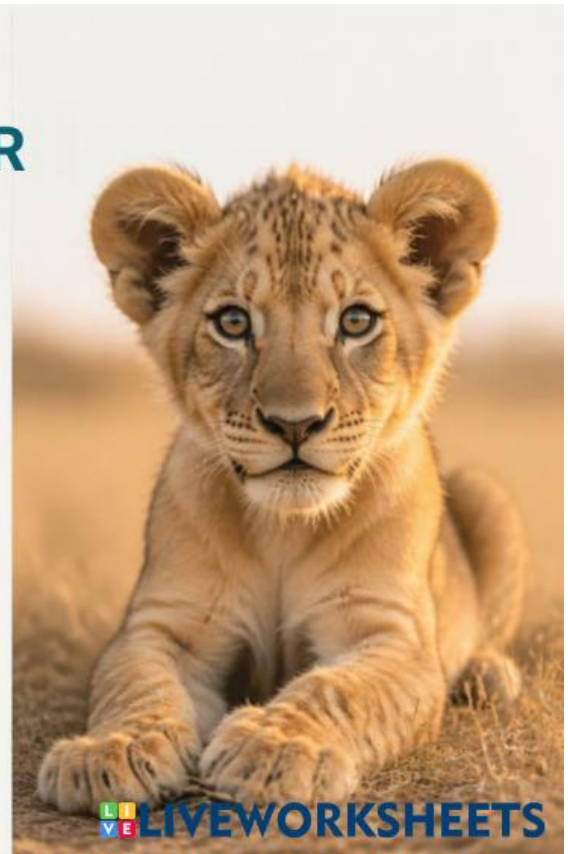

1. What is a mammal?
A. A group of plants B. A group of animals C. A type of insect **Answer:** _____

2. What do most mammals have on their bodies?
A. Hair or fur B. Feathers C. Scales **Answer:** _____
