

Name: _____

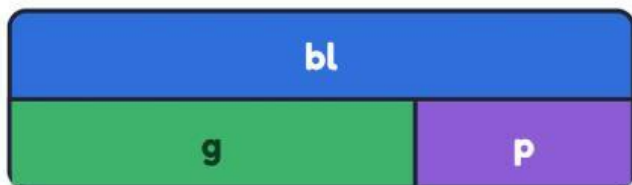

Homework

Show how different parts can add up to the same whole

1 An equation shows that two expressions are _____. Tick **1** correct answer

- ☐ equal
- ☐ unfinished
- ☐ opposite

2 Which equations match this image? Tick **2** correct answers

- ☐ $bl = g + p$
- ☐ $g = bl + p$
- ☐ $p + g = bl$
- ☐ $p = g + bl$

3 Which equations match this image? Tick **2** correct answers

- ☐ $t + o + y = pk$
- ☐ $t = pk + o + y$
- ☐ $t + o = pk + y$
- ☐ $pk = y + t + o$

Name: _____

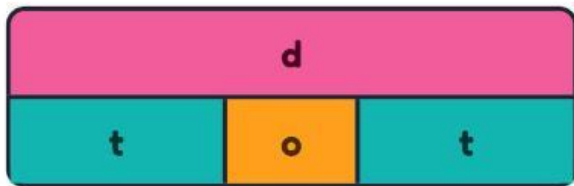

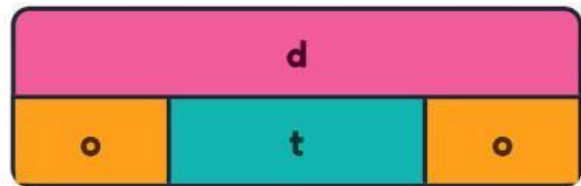

Homework

- 4 Which equations match this image? Tick **2** correct answers

- ☐ $g \times 4 = b$
☐ $4 \times b = g$
☐ $b + b + b + b = g$
☐ $b \times g = 4$

- 5 Which bar model represents this equation? $d = 2 \times t + o$ Tick **1** correct answer

☐☐

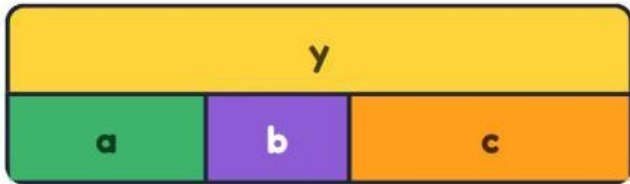

- 6 Complete this equation. $pk = b + \text{_____} \times o$

Name: _____

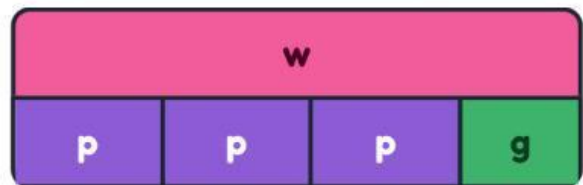

Homework

- 7 Which equation does **NOT** match this image? Tick **1** correct answer

- ☐ $y = a + b + c$
☐ $b + a + c = y$
☐ $a = y + b + c$
☐ $c + b + a = y$

- 8 Which bar model represents this equation? $w = 3 \times p + g$ Tick **1** correct answer

☐☐

- 9 Which expressions are equivalent to $4 \times b$? Tick **2** correct answers

- ☐ $b + b + b + b$
☐ $4 + b$
☐ $b \times 4$
☐ $b + 4$

- 10 Complete this equation. $pk = 2 \times \underline{\hspace{2cm}} + o$
