

1

More meaningful feedback on the work of their peers and produce a new version.

2

Students work on a real-life question. They research, discuss and present their ideas.

3

Before the activity, the teacher shares a clear goal. Students know what they are doing and what they are expected to learn.

Today's goal:
I can use new vocabulary to talk about healthy food.

4

After a diagnostic test, the teacher identifies strengths and areas to improve and plans the next lessons.

5

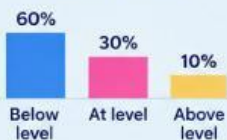

Students use a checklist to revise their own writing before submitting it.

6

The teacher analyses reading results and uses them to plan differentiated activities for different levels.

Reading Results

7

In the same class, some students take different tasks to better match their needs.

Level 1

- Use pictures
- Find words
- Complete the sentence

Level 2

- Write a paragraph
- Use new vocabulary
- Add examples

8

Students imagine their life in 10 years and create a short presentation.

9

During a speaking activity, the teacher listens and gives feedback. Students repeat and use correct forms.

10

Students work on an environmental topic. They find solutions, collaborate and present their ideas to take action.
