Listen to a talk in a psychology class.

NOTE TO STUDENT:

Do NOT look at the questions on the next page until after you listen. You may use a pencil and a piece of paper to take notes.

32. What is the main focus of the talk?

- a. Why people fear losses more than they value gains
- b. How emotions influence decision-making in gambling
- c. Why certain investments produce negative feelings
- d. How people balance short-term and long-term rewards

33. According to the talk, why might investors keep declining stocks?

- a. They prefer to avoid paying additional taxes.
- b. They believe the market always recovers eventually.
- c. Selling them would make the loss feel more real.
- d. They expect short-term risks to bring higher returns.

34. What example does the speaker use to show loss aversion in marketing?

- a. Homeowners often offer free services to attract buyers.
- b. Businesses lower prices to increase sales volume during slow periods.
- c. Companies use phrases that inspire customers to act quickly.
- d. Marketers use data to identify profitable customer groups.

35. Why does the speaker mention retirement savings programs?

- a. To compare government spending with private investment behavior
- b. To explain why people often lose money in investment accounts
- c. To argue that emotional biases have little effect on financial planning
- d. To show how to apply insights about loss aversion to real-world decisions

Listen to a talk in an art history class.

NOTE TO STUDENT:

Do NOT look at the questions on the next page until after you listen. You may use a pencil and a piece of paper to take notes.

36. According to the talk, what made Impressionist paintings different from earlier art?

- a. They followed strict rules for perspective and proportion to capture emotion.
- b. They focused on religious themes rather than scenes from nature.
- c. They used darker tones to emphasize emotional tension rather than bright colors.
- d. They captured the temporary effects of light and color instead of fixed details.

37. What does the speaker point out about Monet's Impression Sunrise?

- a. It was criticized for appearing unfinished.
- b. It was rejected because its subject matter was considered inappropriate.
- c. It was the first painting to use synthetic pigments on canvas.
- d. It was influenced by Italian landscape painters of the early Renaissance.

38. What can be inferred about the connection between Impressionism and science?

- a. The movement developed as a reaction against scientific progress.
- b. Artists sought approval from scientists before displaying their work.
- c. Scientific ideas about vision influenced how artists thought about perception.
- d. Painters used laboratory methods to test the accuracy of their representations.

39. What will the speaker most likely discuss next?

- a. How Impressionism declined as photography became more popular
- b. How Post-Impressionist painters expanded on Impressionism
- c. How the Impressionist movement spread to other parts of Europe
- d. How Post-Impressionism became more popular to display in modern museums
