Reading

1- City is often described as a large and a highly populated area. Therefore, city life is living in a large populated, technologically advanced area. According to the World Health Organization, 54% of the world's population lived in urban areas by 2014. A city is technologically more advanced and complex than the countryside. Therefore, there are many advantages in living in a city. Technology makes our lives easy in a city. Cities have many facilities like high-quality hospitals, educational institutes, banks, shops and other business institutes. This makes our life easy as we can access the facilities provided by these institutes and organisations without delay. Moreover, many employment opportunities are available in the city as many major business institutes, factories are located here. City life also gives us access to developed infrastructure facilities, like water, electricity, telecommunication and transportation facilities. However, we can also notice a difference in the behaviour of the people living in the city. City dwellers tend to be busier, ambitious and distant compared to the village folk.

2- Many people continue to skip breakfast despite it being the most important meal of the day. Busy people often rush out the door in the mornings without giving their bodies the fuel they need to handle a long day at work. They end up feeling tired by the afternoon and resort to the office snack machine or biscuit tin.

Loysa Hourigan, from Nutrition Australia, said that catching up on food at lunchtime did not provide the body with enough sustenance to keep it going for the rest of the day. " Even if you have had lunch, you won't have as much food as you need. Your brain gets depleted of glucose and you feel tired," Ms Hourigan said.

According to Ms Hourigan, wholegrain bread and cereals provide endurance. Milk, eggs, and baked beans provide protein, which helps people to be alert. Rolled oats are also an excellent endurance food.
