

The Busy Corporate Office (Adjectives & Pronunciation)

Part 1: The Adjective Hunt *Instructions for Students: Read the story below. Click on all the ADJECTIVES you can find.*

The new corporate office is very modern and bright. It has a large, open floor plan with tall glass windows. The accounting department is on the second floor, which is always quiet and cold. However, the engineering team works in a noisy and busy area on the first floor. They use heavy, expensive equipment every day to test industrial parts. The company also has a small, fast elevator that is often broken. The employees are happy because the cafeteria serves hot, delicious coffee and fresh food. Yesterday, a difficult international client visited the headquarters, but the smart customer service team solved the big problem quickly.
