

PART 5

Questions 35 to 40

Read the text below. Eight sentences have been removed from the text.

For Questions 33 to 36, choose from the sentences (A-D) to fit each gap.

For Questions 37 to 40, choose from the sentences (E-H) to fit each gap.

For each question, mark the correct answer (A-H) on your answer sheet.

The Little Mermaid

Once upon a time, there was a young mermaid named Ariel. 33 Ariel loved to swim to the surface of the water and look at the humans and their ships.

One day, during a storm, a prince fell off a ship and into the sea. Ariel saved him and took him to the shore. She wanted to be with him but as a mermaid, she couldn't walk on land. 34

Ariel went to the Sea Witch and asked for help. The Sea Witch gave her a potion that would turn her into a human for three days. But there was a catch: she would lose her voice, and if the prince didn't marry her, she would turn into sea foam.

35 She went to the prince's castle, but he didn't know she was the one who saved him. He was going to marry another princess, and Ariel was very sad.

On the last day, Ariel was about to turn into sea foam. But her sisters gave her a magic knife to save her. 36 She became a spirit of the air, spreading kindness forever.

- A Ariel made a brave choice.
- B From that moment, she desired to be human.
- C She lived under the sea with her father, the King, and her five sisters.
- D Ariel drank the potion and became human.

The Great Barrier Reef, Australia

The Great Barrier Reef is a huge, beautiful underwater world. It's located off the coast of Australia. It is the biggest coral reef in the whole wide world!

37	
----	--

38	
----	--

 These little coral creatures work together to build giant structures that create the reef. The coral is colourful and beautiful, with shades of pink, purple, blue, and yellow. There are many different kinds of coral, each one making a different shape and size.

The Great Barrier Reef is home to many amazing animals. You can find fish, sea turtles, sharks, dolphins, and even big whales swimming in the warm waters. Some of the fish are brightly coloured, and some are as big as a grown-up!

39	
----	--

The reef also helps protect the land from big waves and storms. It acts like a shield, keeping the shore safe and calm.

40	
----	--

 Pollution, climate change, and other problems are hurting the coral and the animals that live there. People all around the world are working hard to protect the reef so that it can stay beautiful for many years.

The Great Barrier Reef is a magical place, and we all need to take care of it so that future generations can enjoy it, too!

- E The reef is made up of millions of tiny animals called coral.
- F It is so big that it can be seen from space!
- G Sadly, the Great Barrier Reef is in danger.
- H The reef is like a giant underwater city where animals live, play, and find food.
