LIVEWORKSHEETS

ชื่อ-นามสกุล : _____ ชั้นเรียน : _____

1. **Read the following passage about a search engine and answer the questions.**

A search engine is a software system that is designed to carry out web searches. It provides links to other websites. A user enters keywords or key phrases into a search engine and receives a list of web content results in the form of websites, images, videos or other online data that semantically match with the search query. For instance, a person who performs a search engine search for "restaurants near me" would (ideally) see a list of websites that belong to restaurants in that person's area.

1. What is a search engine?

_____

2. What does it do in surfing the websites?

_____

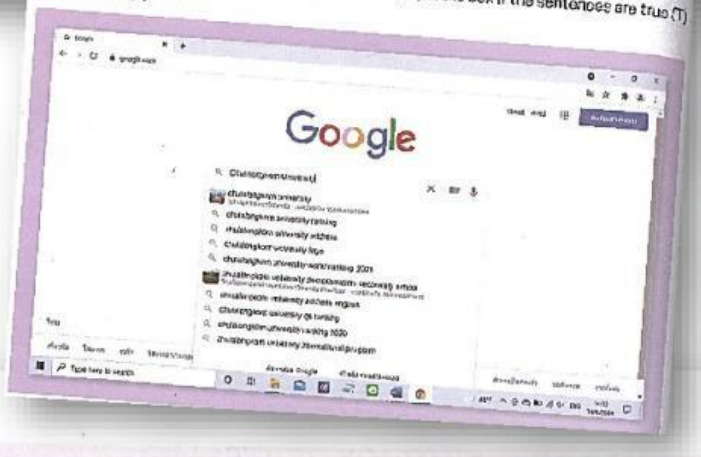

3. What does one have to perform to find the content results?

_____

4. Can we use a search engine without the web browser installed?

_____

4. Look at the following search engine. Put a tick (✓) in the box if the sentences are true (T) or false (F).

	T	F
1. From the search engine above, you can find the information of Chulalongkorn University.	☐	☐
2. You cannot find the logo here.	☐	☐
3. You can find the world ranking of this university in 2020.	☐	☐
4. You cannot find the information about the demonstration school.	☐	☐
5. Is the international program available in this university?	☐	☐
