READING: LEARNING ENGLISH WITH TECHNOLOGY

Nowadays, technology is a very important part of our lives, especially for students. Many people use their smartphones and computers to learn English. There are many apps and websites that can help you practice reading, listening, and grammar.

Using technology to learn has many benefits. First, it is very flexible. You can study at your own pace and at any time you want. Second, it is interactive. Instead of just reading a book, you can play games, watch videos, and do online exercises that give you immediate feedback.

However, technology also has some disadvantages. Sometimes, the internet connection is slow, which can be frustrating. Also, it is easy to get distracted by social media or messages when you are trying to study. Therefore, it is important to find a quiet place and turn off notifications to focus on your learning.

A. MULTIPLE CHOICE (Choose the correct answer)

1. What do many people use to learn English?
