### Nonrenewable Energy Questions

- \_\_\_\_ 1. What is nonrenewable energy?
  - a. Energy that can be replenished easily
  - b. Energy that cannot be replenished easily
  
- \_\_\_\_ 2. Oil, Coal, and Natural Gas are examples of nonrenewable energy.
  - a. True
  - b. False
  
- \_\_\_\_ 3. Oil is energy that comes from \_\_\_\_.
  - a. underground reservoirs
  - b. the gas station
  
- \_\_\_\_ 4. Natural gas is energy that comes from \_\_\_\_.
  - a. rocks
  - b. methane gas
  
- \_\_\_\_ 5. Coal is energy that comes from \_\_\_\_.
  - a. plants that lived millions of years ago
  - b. plants in your garden
  
- \_\_\_\_ 6. Nuclear power is energy that comes from \_\_\_\_.
  - a. stones
  - b. splitting atoms
  
- \_\_\_\_ 7. Oil is easy to produce. This is a(n) \_\_\_\_.
  - a. advantage
  - b. disadvantage
  
- \_\_\_\_ 8. Natural gas production can harm wildlife populations. This is a(n) \_\_\_\_.
  - a. advantage
  - b. disadvantage
  
- \_\_\_\_ 9. Coal produces high amounts of greenhouse gases. This is a(n) \_\_\_\_.
  - a. advantage
  - b. disadvantage
  
- \_\_\_\_ 10. Nuclear power is a very efficient energy producer. This is a(n) \_\_\_\_.
  - a. advantage
  - b. disadvantage
