A. Write the words in the box in the correct place. (7x2 = 14 pts.)

crust – inner core – outer core – mantle

1.
2.
3.
4.

1. _____
2. _____
3. _____
4. _____

magma chamber – volcanic ash cloud – vent

5. _____
6. _____
7. _____

B. Match the key words to complete the sentences. (3x2=6 pts.)

erupt – volcano – lava

When we think about volcanoes we can talk about three different kinds of them; active , dormant and extinct. To me, the most interesting one is the extinct volcano. It erupted thousands of years ago, but it will probably never _____ again. Scientists believe there is no longer _____ or magma in the centre of it. One example of this kind of _____ is Mount Kilimanjaro in Africa.
