

In this section you will hear a conversation about a language learning technique called the "Parrot and Overshadow Method".

- Your task will be to decide whether the following statements are true, false or we do not know because the text does not say and write the appropriate letter in the boxes on the right.
- Write **A** if the statement is true, write **B** if the statement is false, and write **C** if the text does not say.

A = TRUE

B = FALSE

C = THE TEXT DOES NOT SAY

✓ <i>Peter is a less experienced teacher than the woman.</i>	B
1. The woman asks Peter because she would like to sound like a native speaker.	
2. Peter doesn't think it's important for learners of English to sound like a native speaker.	
3. This method only works if you can already understand English that is spoken quickly.	
4. It's the first time the woman has heard about this method.	
5. Parroting is actually more important than overshadowing.	
6. The method only works if the learner speaks out loud.	
7. Any authentic audio or visual material can be used, if it has a subtitle or a script.	
8. Peter recommends that when students listen to the material for the first time, they should also read the text.	
9. Overshadowing means that the student should repeat each sentence after the speaker.	
10. This method was invented by a native speaker.
