

Read the information.

Jellyfish

Some jellyfish are very small, but some are very big. Some jellyfish are 1 metre long! They live in the water and can swim slowly. They've got a soft body and long tentacles but they haven't got eyes or a nose! Some jellyfish are dangerous so you must be careful when you go swimming!

tentacles

Turtles

Turtles are reptiles. Some turtles are very big, some are 2 metres long! They have got a hard shell, four legs and they can swim very fast. They eat grass in the sea and they live alone. Turtles aren't usually dangerous. Do you know that some turtles can live to over 150 years old?

hard shell

Write J (jellyfish) or T (turtle):

Which animal...

1. can be 2 metres long?
2. has got tentacles?
3. hasn't got any eyes?
4. is dangerous?
5. can live for over 150 years?
6. has got a hard shell?

What's your favourite sea animal? Can you describe it?
