

SOLVE:

Three visual math problems are presented, each in a rounded rectangular box.

Problem 1: Inside the box, there are three brown paper bags labeled "Coffee" and one blue container with strawberries. Below the first coffee bag is the text "€ 4". An arrow points from the three coffee bags to the text "€ 6". Another arrow points from the strawberry container to a box containing "? €". A final arrow points from this box to the text "€ 13".

Problem 2: Inside the box, there is a pink box containing a white t-shirt icon and a light bulb. An arrow points from this box to the text "€ 6". To the right, there are two identical sets of the pink box and light bulb. An arrow points from the second set to a box containing "? €".

Problem 3: Inside the box, there are two identical cups of blue ice cream with yellow and red fruit. An arrow points from this box to the text "€ 6". To the right, there are three identical cups of blue ice cream with yellow and red fruit. An arrow points from the third cup to a box containing "? €".

Problem 4: Inside the box, there are two identical beach balls. An arrow points from this box to the text "€ 3". To the right, there are four identical beach balls. An arrow points from the fourth beach ball to a box containing "? €".
