

Find the Prime Factors of the Numbers

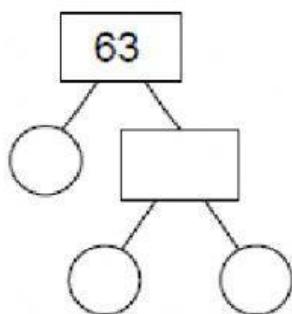

1 )

2 )

3 )

Prime Factors

$$\underline{\quad} \times \underline{\quad} \times \underline{\quad} = 66$$

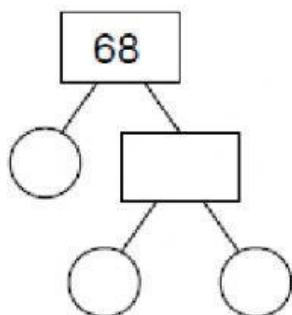

Prime Factors

$$\underline{\quad} \times \underline{\quad} \times \underline{\quad} = 42$$

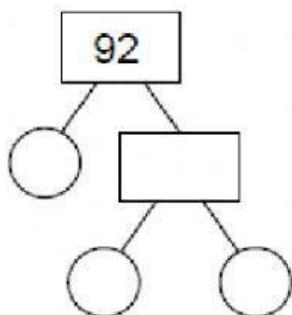

Prime Factors

$$\underline{\quad} \times \underline{\quad} \times \underline{\quad} = 63$$

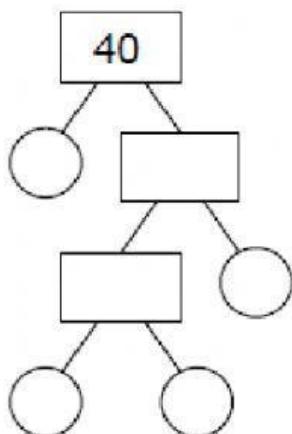

4 )

5 )

6 )

Prime Factors

$$\underline{\quad} \times \underline{\quad} \times \underline{\quad} = 68$$

Prime Factors

$$\underline{\quad} \times \underline{\quad} \times \underline{\quad} = 92$$

Prime Factors

$$\underline{\quad} \times \underline{\quad} \times \underline{\quad} \times \underline{\quad} = 40$$
