Fill in the correct word derived from the word in bold.

Many people suffer from 1) or stage fright when they have to perform in front of a large audience. They worry that they will not be as 2) as they would like to be. A useful 3) is to prepare yourself thoroughly by rehearsing every detail of what you will say or do 4) in your head. In this way, you will be sure to give a great 5)

NERVE
SUCCEED
SUGGEST
REPEAT
PERFORM

(Marks: $\frac{\quad}{5 \times 2}$ 10)

You are going to read an article about an underwater explorer. Choose the most suitable heading from the list A-G for each part (1-5) of the article. There is one extra heading that you do not need to use. There is an example at the beginning (0).

- A Great Achievements C A Life Underwater
B The Lure of the Ocean D Heroic Actions

- E Spreading the Word G A Lucky Break
F Never Forgotten

Jacques Cousteau: A Remarkable Man

0 C

Jacques Cousteau was an ecologist, conservationist, explorer, filmmaker and inventor. He was a man, who spent practically his whole life underwater investigating the hidden depths of the ocean and who did more to educate the world about the mysteries of the deep than any other person before or since.

1

He was born in June, 1910 in a small town in France. He was a sickly child and spent much of his time in bed, reading and dreaming about a life at sea. In 1920, Jacques' family moved to America and he was encouraged to start swimming to build up his strength. This was the start of his fascination with water and the more he learned through his own experiences, the more passionate he became about 'looking through nature's keyhole'. However, his career in underwater exploration came about by accident.

2

After joining the French Navy and travelling around the world, he was involved in a serious car accident that left him badly injured with two broken arms. He started swimming in the Mediterranean sea to strengthen his weak arms as part of his recovery process and rediscovered his love of the ocean. He developed a pair of underwater goggles and experimented with underwater breathing equipment to allow him to stay underwater for longer periods. His experiments led to the development of the Aqua-Lung which was a commercial success.

3

During the Second World War, he worked for the French Resistance and experimented with underwater

photography. He helped to dispose of German mines and was awarded the Croix de Guerre and the Legion D'Honneur medals for his bravery. In 1942, he made his first underwater film *Sixty Feet Down*. It was eighteen minutes long and was entered in the Cannes Film Festival. After the war, he bought a ship which he named the *Calypso* and continued to make films. He wrote a book called *The Silent World* which became a best seller and was the subject of his next film. It received the Palme d'Or at Cannes and won an Academy Award.

4

His film successes led to his own television series produced by ABC called *The Undersea World of Jacques Cousteau*. This series of weekly shows ran for eight years and was immensely popular around the globe. Jacques Cousteau became a household name. He promoted the conservation of the oceans and highlighted the problems of overfishing, pollution and the destruction of the coral reefs. He established the Cousteau Society in 1974 to protect ocean life and discovered new species, raised sunken ships and even led an expedition to Antarctica.

5

Jacques Cousteau will be remembered as one of the great men of the twentieth century. His documentaries, discoveries and inventions won him many awards including the National Geographic Society's Gold Medal and Centennial Award and the U.S. Presidential Medal of Freedom. He was truly an extraordinary man whose love of the sea, determination and passion are an example to us all.
