

Form 3. Test " Animal Homes. Comparison of animals."

Vocabulary. Look at the pictures and write the words.- Skaties uz attēliem un raksti vārdus.

Task 2. Read and answer the questions.- Izlasi un atbilde uz jautājumiem (ar vienu vārdu).

Facts about animals.

There are large and small animals in the world. The elephant is the largest of all land animals and the whale is the largest of all sea animals. The smallest animal is a fat-tailed shrew. But it eats very much – two and a half times as much as it weighs.

The fastest insect is the gadfly which flies 40 or 50 miles an hour. Many naturalists think that the cluck hawk is the fastest bird. Some say it can go more than 150 miles an hour.

Dolphins are fast swimmers. They can swim as fast as a motorboat going at 30 miles an hour.

The cheetah, most people agree, can go faster than any other four-legged animal. Its record is about 75 miles an hour. Hunters have trained cheetahs to kill antelopes and deer.

People live longer than most animals. A man lives about 70 years. Women live longer than men. But more boys than girls are usually born in the world. Among animals only bacteria live longer than the tortoise. Tortoises usually live more than 100 years. And how long do other animals live?

Mouse 2-3 years
Squirrel 11 years
Rabbit 12 years
Sheep 10-15 years
Cat 13-17 years
Lion 25 years

Horse 30 years
Hippopotamus 40 years
Alligator 55 years
African elephant 60 years
Dolphin 65 years
Raven 69 years

- What animal is the largest?
- What animal is the smallest?
- What animal is the fastest?
- Who lives longer than tortoises?
- Which animal lives the longest?

Grammar.

Task 1. Read and complete with the correct form.- Izlasi un aizpildi ar pareizo formu.

1. A rabbit is a (good) pet than a lizard..
