died	cause	buried	discovered	excavated
preserved	thieves	analyzed	artifacts	objects

The City of Pompeii

In 79 b.c.e., over 16,000 people _____ in one night. The _____ was a terrible volcano. When mount vesuvius erupted, the people of Pompeii were quickly _____ under volcanic ash. After the volcano, Pompeii was forgotten for nearly 1,700 years. Then, in 1748, it was _____ by chance. When the ruins were _____, many people were found still in bed or eating at the table! Thanks to the ash, most things were perfectly _____. The ash also prevented _____ from stealing treasure. Scientists have _____ samples of the people's food, and they have studied many _____, such as clothes and paintings. Most _____ are in museums, so we can see how the people of Pompeii lived thousands of years ago!
