

Soil Layers and Animals

Answer the questions about the animals and soil layers

DOWN

1. A reptile with a long body and no legs.
3. A small creature that lives in the soil. It has four letters.
5. The layer above the subsoil.
6. It holds the roots, stores nutrients and provides support for the plants.
8. An animal that is a mammal and also lives in the soil.
9. The layer below the topsoil. It has bacteria, fungus and minerals.

ACROSS

2. An animal that lives in the soil. It has three letters.
4. An insect that makes short, loud noises by rubbing its wings together.
7. The layer above bedrock and below the subsoil.
10. The last layer. It is located below the middle layer.
