Describing My Hearing

SIDES, DEGREE, TYPE & LOCATION

The characteristics of a person's hearing is typically described in this order:

1. **Sidedness** (unilateral or bilateral)
2. **Type** (conductive, sensorineural or mixed)
3. **Degree** (mild, moderate, etc.)

Here's an example:
a **unilateral sensorineural** hearing loss **sloping** from **moderate** to **severe** in the left ear and typical hearing in the right ear.

Directions: Use information from your audiogram and audiologist's report and your research to select the characteristics of your hearing.

Sidedness	Type	Degree
Unilateral	Conductive	Mild
Bilateral	Sensorineural	Moderate
	Mixed	Severe
		Profound
		Sloping?
