

Mouse Pointers in Microsoft Word

How does your mouse look and what is your mouse saying?

As you move the mouse over the Microsoft Word window it changes shape to indicate the availability of different functions. Drag the correct mouse pointer to the matching name and in your own words, describe the mouse pointer and explain its purpose.

1) Busy Cursor

2) Resize pointer

3) 4-Headed arrow

4) I-beam

5) Select Pointer

6) Link Pointer/hand pointer
