

LES FRACCIONS - 3^r TRIMESTRE

1. Escribe la fracción de cada figura pintada:

$$\frac{\square}{\square}$$

$$\frac{\square}{\square}$$

$$\frac{\square}{\square}$$

$$\frac{\square}{\square}$$

$$\frac{\square}{\square}$$

$$\frac{\square}{\square}$$

$$\frac{\square}{\square}$$

$$\frac{\square}{\square}$$

$$\frac{\square}{\square}$$

2. Escribe aquestes fraccions:

$$\frac{5}{6} \text{ ----->}$$

$$\frac{3}{7} \text{ ----->}$$

$$\frac{8}{9} \text{ ----->}$$

$$\frac{4}{8} \text{ ----->}$$

$$\frac{2}{10} \text{ ----->}$$

$$\frac{2}{3} \text{ ----->}$$

3. Escribe amb xifres:

cinc dècims	----->	$\frac{\square}{\square}$	quatre cinquens	----->	$\frac{\square}{\square}$
tres vuitens	----->	$\frac{\square}{\square}$	cinc novens	----->	$\frac{\square}{\square}$

4. Escull < o > segons correspongui:

(Fraccions con el mismo denominador)

www.actitudis.com

5. Ordena aquestes fraccions:

Escribe las fracciones en los cuadros, según sean mayores o menores

> > $\frac{4}{4}$ $\frac{5}{4}$ $\frac{3}{4}$	> > $\frac{6}{12}$ $\frac{12}{12}$ $\frac{3}{12}$
> > $\frac{14}{21}$ $\frac{7}{21}$ $\frac{23}{21}$	> > $\frac{34}{17}$ $\frac{15}{17}$ $\frac{41}{17}$

FICHA: 06-01-01-042 © Grupo Geomedia S.L. mundoprimeria.com

6. Ordena de major a menor aquestes fraccions:

$\frac{8}{12}$
 $\frac{8}{10}$
 $\frac{8}{15}$

>

>

7. Fes aquestes sumes de fraccions:

$$\frac{5}{8} + \frac{2}{8} = \frac{\quad}{\quad}$$

$$\frac{5}{12} + \frac{11}{12} = \frac{\quad}{\quad}$$

$$\frac{4}{9} + \frac{2}{9} = \frac{\quad}{\quad}$$

$$\frac{9}{15} + \frac{8}{15} = \frac{\quad}{\quad}$$

8. Resta aquestes fraccions:

$$\frac{7}{9} - \frac{1}{9} = \frac{\square}{\square} \quad \frac{4}{6} - \frac{1}{6} = \frac{\square}{\square} \quad \frac{6}{8} - \frac{1}{8} = \frac{\square}{\square}$$

$$\frac{6}{9} - \frac{1}{9} = \frac{\square}{\square} \quad \frac{5}{7} - \frac{1}{7} = \frac{\square}{\square} \quad \frac{3}{5} - \frac{1}{5} = \frac{\square}{\square}$$

$$\frac{3}{6} - \frac{1}{6} = \frac{\square}{\square} \quad \frac{5}{8} - \frac{1}{8} = \frac{\square}{\square} \quad \frac{4}{7} - \frac{1}{7} = \frac{\square}{\square}$$

$$\frac{5}{9} - \frac{1}{9} = \frac{\square}{\square} \quad \frac{2}{5} - \frac{1}{5} = \frac{\square}{\square} \quad \frac{2}{6} - \frac{1}{6} = \frac{\square}{\square}$$

$$\frac{4}{9} - \frac{1}{9} = \frac{\square}{\square} \quad \frac{4}{8} - \frac{1}{8} = \frac{\square}{\square} \quad \frac{3}{7} - \frac{1}{7} = \frac{\square}{\square}$$

9. Relaciona la fracció d'aquests nombres:

$\frac{2}{9}$ de 81 =	30	3	$\frac{3}{4}$ de 12 =
$\frac{10}{20}$ de 60 =	10	18	$\frac{1}{3}$ de 9 =
$\frac{1}{2}$ de 4 =	40	9	$\frac{2}{3}$ de 15 =
$\frac{4}{6}$ de 24 =	16	2	$\frac{5}{8}$ de 64 =

10. Escriu un nombre mixt per a cada expressió:

- Dos i tres cinquens -----> $\square \frac{\square}{\square}$
- Cinc i un quart -----> $\square \frac{\square}{\square}$
- Dos i dos terços -----> $\square \frac{\square}{\square}$

- Tres i dos vuitens -----> $\frac{\square}{\square}$

- Un i mig -----> $\frac{\square}{\square}$

- Set i mig -----> $\frac{\square}{\square}$
