

# Language alphabet. Syntax

## 1. Fill out the sentence.

The syntax of a programming language

\_\_\_\_\_ when writing a program.

## 2. Move the words to the appropriate place

The comments are used mostly for programmers to read and understand the code.

There are two ways to create a comment:

1. The first is to use the  symbol. The computer will ignore any text that is written after the '#' symbol in that row.

2. Multiple line comments are slightly different. Use 3 single quotes  before and after the part you want to comment.

#

'''

## 3. Match the picture with the description

Answers:

Function for displaying data on the screen.

Function for entering data from the keyboard

**4. Set the match**

Operator
+
-
*
/
//
**
%

Operation
Multiplication
