

### Basics of a volcano worksheet

1. In the diagram below is a picture of a volcano. Use the words below to fill in the missing labels:

Magma Chamber, Crust, Main Vent, Side Vent, Crater, Lava, Ash and Gas cloud.

2. Match up the key words with their correct definition:

|                   |                                                      |
|-------------------|------------------------------------------------------|
| Magma Chamber     | A secondary leaving point for the magma              |
| Crust             | Where the lava and ash cloud comes out from          |
| Main Vent         | Volcanic gases which escape through the main vent    |
| Side Vent         | Outermost layer of the earth                         |
| Crater            | Where the magma is stored in the volcano             |
| Lava              | Molten rock which is given off when a volcano erupts |
| Ash and Gas cloud | The main leaving point for the magma                 |
