Albert Einstein: the Greatest Scientist of the 20th Century

Not many people really deserve the title "genius" but Albert Einstein ['aɪnstaɪn]
was one of them. His discoveries have changed the way we understand our world
today. Albert Einstein was born in Germany in 1879. He was a very slow learner
at first. He even had trouble learning to speak! His parents were really worried.
As a boy, Albert Einstein was very unhappy at school. His teachers treated him
badly because they thought he wasn't very clever. His marks were usually bad.

In 1896 Albert went to Zurich to study at one of the best
technical universities. There his abilities in mathematics
and physics began to show. After he graduated in 1902,
Einstein took a job at the Swiss Patent Office. 1905 was
his "Miracle Year", as he published three important es-
says including one on the "Special Theory of Relativity".
Later Einstein wrote "The Theory of Gravity" and "The
General Theory of Relativity". Soon he became a world-
wide celebrity.

In 1914 Einstein moved back to Berlin. In 1921 Einstein
was awarded the Nobel Prize for Physics, and modestly
travelled third class to Stockholm to receive it. He used
his influence to lecture around Europe and the USA to
promote world peace. Soon the Nazis came to power in Germany. So in 1933 he
had to go to America where he lived for the rest of his life. He died on April
18th, 1955 in New Jersey, leaving behind a new way for us to look at the world.

1. Albert Einstein _____.

    a) was a real genius
    b) could hardly be regarded as a genius
    c) is a real genius for some people

2. Albert's progress at school _____.

    a) was not very good
