

Разгледайте внимателно къщичките и открийте коя от кои елементи е съставена.

До всяка къща има квадрат с различен цвят. Вземете го и го поставете в квадратчетата отдясно където са нарисувани елементите на къщите.

Коя къща от кои елементи е съставена

11

The image shows a matching exercise for children. On the left, there are six houses arranged in a 3x2 grid. Each house has a unique combination of a roof color, a window shape and color, and a door shape and color. Above each house is a colored arrow pointing to it and a small colored square. At the top center, a cartoon bear is holding a glue stick. On the right, there are six rows of empty boxes for pasting the pieces. Each row contains a large house shape, a small square, a small circle, and a small door shape, all in different colors. The goal is to match the colored squares from the left to the corresponding shapes on the right.
