

## Science Review

**Drag the words to complete the sentences.**

Remember to read carefully each of them.

Crust    Mantle    Surface    Core

Crust    Mantle    Surface    Crust    Core

1.-The main layers of the Earth are: the \_\_\_\_\_ (in the center of the planet), the \_\_\_\_\_ (it is made of lava) and the \_\_\_\_\_ (where we live).

2.-The Surface of the Earth is on the top of the \_\_\_\_\_ of the planet.

3.-On the \_\_\_\_\_ of the Earth there are many different landforms and water bodies.

deposition    change    weathering  
fast              erosion      slow

- 4.-The Surface of the Earth is in constant \_\_\_\_\_.
- 5.-Weathering, erosion and deposition produce \_\_\_\_\_ changes on the surface of Earth.
- 6.-Earthquakes , landslides and volcanic eruptions produce\_\_\_\_\_ changes on the Surface of Earth.
- 7.-\_\_\_\_\_ is the breaking down of rocks.
- 8.-The \_\_\_\_\_ is the movement of the little pieces of rock.
- 9.-\_\_\_\_\_ is the dropping of the rock in a new place.

**tornado    earthquake**  
**hurricane    tsunami    landslide**  
**volcanic eruption    Flooding**

10.- \_\_\_\_\_ it releases lava, ashes and produces explosions that change the landform nearby.

11.- \_\_\_\_\_ cause rocks and soil to go down a slope (inclined surface).

12.- \_\_\_\_\_ makes the ground to shake and wave.

13.- \_\_\_\_\_ is a fast increase of the water level.

14.- \_\_\_\_\_ is produced when an earthquake happens on the seafloor or very close to the shore, it creates a giant wave that makes floodings.

15.- \_\_\_\_\_ is a powerful wind cone that touches the ground or water.

16.- \_\_\_\_\_ is a tropical storm with violent wind and heavy rain.
