

## ACTIVITY

### Movements of the ocean.

1. Write the name of each movement:

	 <p>→ Corrientes cálidas → Corrientes frías</p>	

2. Match the movement of the ocean with each description:

1. Waves	- changes in the levels of the sea, caused primarily by the moon.
2. Tides	- swells on the surface of the ocean produced by the wind.
3. Currents	- masses of water that flow like rivers under the ocean.
