

# THE WATER: OCEANS, SEAS AND RIVER

## Social studies Workshop

1. Select the state of the water in this pictures:

2. Drag and drop the state of the water and choose how to change from liquid water to solid ice and from liquid water to water vapor:

Water vapor

Solid ice

Liquid water

3. Select True or False according to each sentence:

- The water in Rivers is salt water \_\_\_\_\_
- The 97% of water in Earth is salt water \_\_\_\_\_
- The human only drink salt water \_\_\_\_\_
- According to your senses water has no taste, odor or color \_\_\_\_\_
- The same water that the dinosaurs drank, we are drinking right now \_\_\_\_\_
- Fresh water can be found in rivers, ice caps and lagoons \_\_\_\_\_

4. Match the picture with the description:

The vapor rises and condenses to form CLOUDS.

The clouds are so heavy and precipitation begins: rain, sleet, snow.

The sun heats the liquid water in the seas, rivers and oceans and the water evaporates.

5. Do the next game, clic on the picture: En la parte inferior de la página encontrarás un juego para practicar moviendo con las flechas de tu teclado a la gota de agua
