

**1. Put the words into the correct place.**

Pivot point

Load

Lever

Effort

A \_\_\_\_\_ makes it easier to move an object. It's a rigid bar with a \_\_\_\_\_. This is the point where the lever turns. The object we need to move exerts a force. This is called the \_\_\_\_\_. The person using the lever applies a force which is called the \_\_\_\_\_.

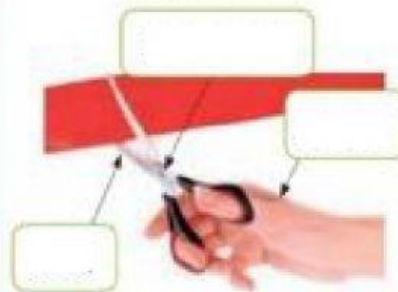

**2. Complete with the correct word (pivot point, effort, load).**

**a bottle opener**

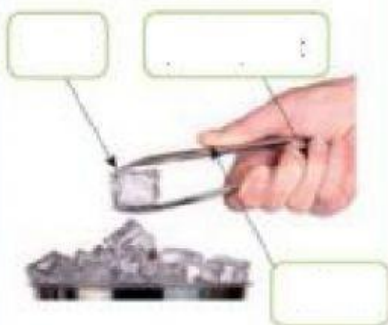

Some levers have the load in the middle.

**scissors**

Some levers have the pivot point in the middle.

**ice tongs**

Some levers have the effort in the middle.

3. Look at the different objects and put its names into the correct place.

Wheelbarrow

Nutcracker

Hammer

Pliers

Stapler

Tweezers
