

Name: \_\_\_\_\_

LESSON  
**12**

## Cause and Effect

When you read, think about what happens.  
Think about why it happens.

Think about what happens in each picture.

The children play.    It begins to rain.    They go inside.

Sometimes when one thing happens,  
it makes something else happen.

Now read these sentences.

The bug lands on Becky.  
Becky waves her arm.

- Draw a circle to show what happens next.

**When you read, think about how one thing  
can make another thing happen.**

## Practicing Comprehension Skills

Read the sentences.

Think about what happens and why.

A Bee's Life

Bees get food from flowers.

A bee takes the food back to the hive.

Then the bee dances for the other bees.

The dance tells the other bees where to find food.

Bees look for food in warm weather.

In cold weather, bees stay in the hive.

Then they eat the honey stored in the hive.

Read the first part of each sentence.

Draw a line under the words that tell  
what happens next.

1. Bees need food, so

they go to a store.    they get it from flowers.    they buzz

2. When a bee finds food,

it dances to tell the others.    it flies away.    it hides

3. When it is cold,

bees sleep.    bees fly away.    bees stay in the hive
