

EVALUACIÓN DE LOS APRENDIZAJES

SCHOOL YEAR:	2020-2021	QUIMESTRE:	2	SUBJECT:	Science
TEACHER:	Maria José Flores	GRADE-COURSE:	3 EGB	CLASS:	A, B, C
DATE:		SCORE:	/25		

UNIT'S NAME:

Unit 1: Living Beings and Animal classification

Unit 2: My Body and Solar System

DCD TO BE EVALUATED	EVALUATION CRITERIA CONSIDERED IN THE EVALUATION
CN.2.3.1. Observe and describe the physical states of objects from their environment and differentiate them by their physical, solid and gaseous characteristics. CN.2.3.4. Observe and identify the types of matter and differentiate them by their characteristics in pure, mixed and artificial substances. CN.2.3.9. Explore and identify energy sources in nature; compare and explain their importance for human life, for movement of bodies and for carrying out all kinds of work. CN.2.3.2. Describe the changes in physical matter in nature, experiment with water and identify its changes due to temperature variation.	CE.CN.2.5. State from observation and experimentation with objects (for example, those used in the preparation of everyday food); discover their properties (mass, volume, weight), changing physical states (solid, liquid and gas), and that they are classified in pure and mixed substances (natural and artificial), that can be separated. CE.CN.2.7. Explain from observation and exploration of the sources, shapes and transformation of energy, recognizing their importance for the movement of bodies and performing all kinds of work in everyday life.

GENERAL INSTRUCTIONS:	• Read the questions carefully. • You have 60 minutes to complete the evaluation. • If you have finished, go through the exam carefully and send it to your teacher.
------------------------------	---

Mark...../3

1) Drag and drop. States of matter.

Solid

Liquid

Gas

EVALUACIÓN DE LOS APRENDIZAJES

Mark...../2

2) Choose the state of matter.

Solid

Liquid

Gas

Solid

Liquid

Gas

EVALUACIÓN DE LOS APRENDIZAJES

Mark...../6

3) Choose the force type push or pull.

push

pull

pull

push

push

pull

pull

push

pull

push

push

pull

Mark...../4

4) Match the reusable energy with its name.

Wind energy

Geothermal
energy

Solar energy

Hydro Energy

EVALUACIÓN DE LOS APRENDIZAJES

Mark...../4

5) Drag and drop the name of each season.

Spring

Fall

Winter

Summer

Mark...../1

6) Select the right definition of gravity.

Gravity is an invisible force that pulls things to the center of the earth.

Gravity is a happy girl.

Gravity is the solar system.

Mark...../1

7) Who discovered gravity?

Cristiano Ronaldo

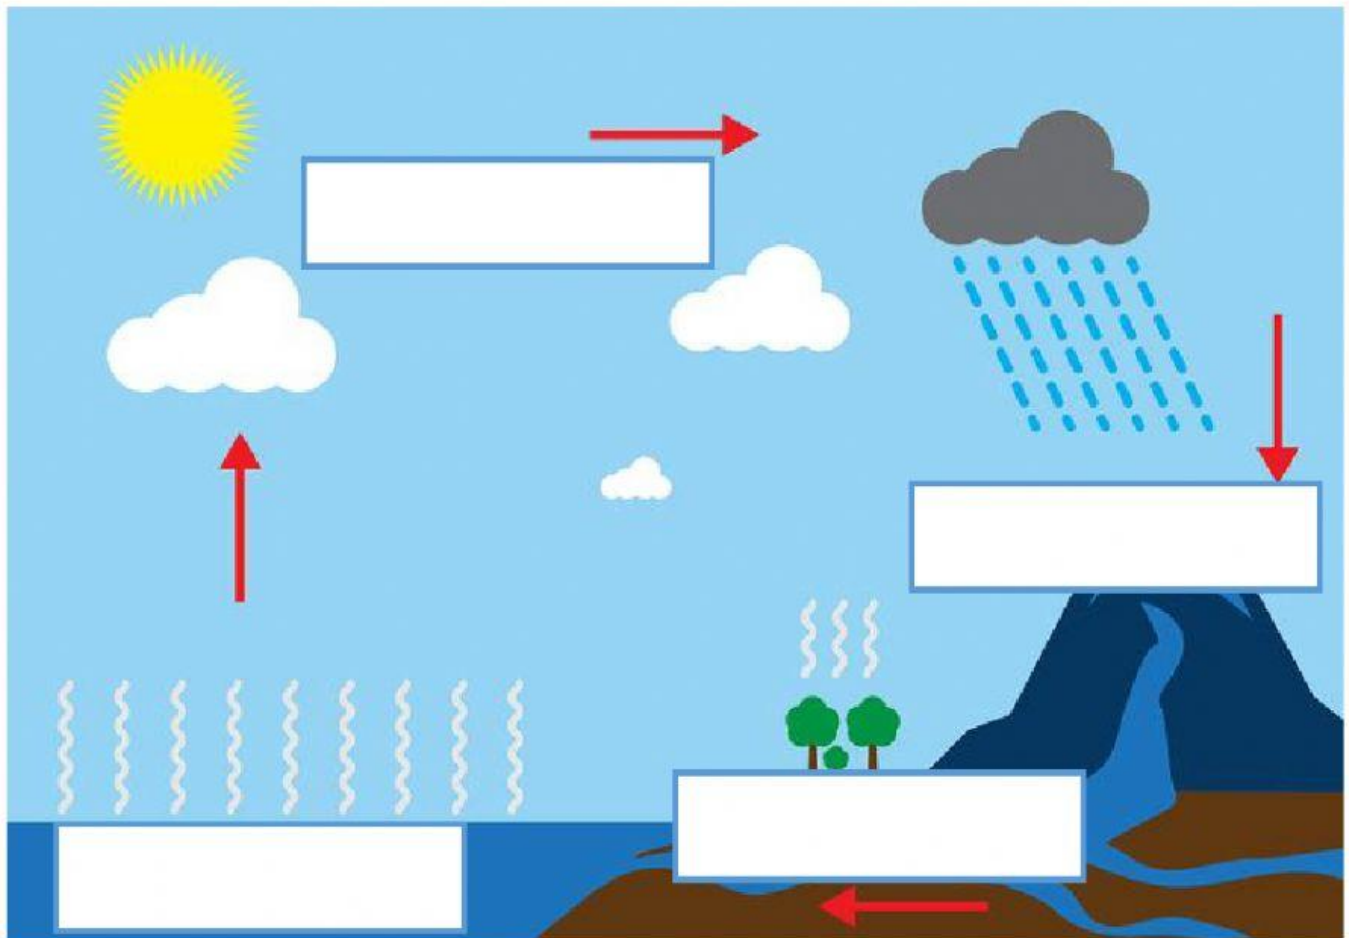

Isaac Newton

Angel Polibio Chaves

EVALUACIÓN DE LOS APRENDIZAJES

Mark...../4

8) Label the water cycle?

Collection

Evaporation

Precipitation

Condensation

ASSESSMENT: Each correct answer is worth 1 point.
 The total score of the exam is / = 10/10
