

# CORONAVIRUS

Coronavirus is a newly discovered virus. It causes a disease called Covid-19. In some parts of the world, it has made lots of people sick. Corona is a Latin for crown, because under the microscope, these viruses look like a crown with spikes ending in little blobs.

A lot of symptoms are similar to the flu. You can have dry and cough, fever, lots of sneezing and problems to breathe. For people who are old or who have health problems are easier to get sick with coronavirus.

If anyone gets sick and feels like they may have coronavirus, they can immediately call their doctors and get help.

Here are some things you can do to protect yourself, family and friends from getting sick:

- 1) wash your hands often using soap and water.
- 2) Sneeze into your elbows.
- 3) Don't touch your face. Don't pick your nose. Don't touch your mouth. Don't rub your eyes. They are the places where the virus enter our bodies.

Remember that this virus can affect anybody. It doesn't matter where you come from or what country you are from. Don't forget, there are a lot of helpers out there who are working to protect us from the virus. We can take a part by keeping our health and stay at home to stop the virus spread to others.
