

Check Your Understanding

Example 1

Given the following information, determine which lines, if any, are parallel. State the postulate or theorem that justifies your answer.

1. $\angle 6 \cong \angle 10$

2. $\angle 4 \cong \angle 7$

3. $\angle 1 \cong \angle 6$

4. $m\angle 2 + m\angle 3 = 180$
