

MATCH EACH ECOSYSTEM WITH THEIR DESCRIPTION:

GRASSLANDS

Driest regions in the world. Little rain. Hot days and very cold nights. A few grasses, small shrubs. Snakes, scorpions, lizards, camels.

DECIDUOUS FORESTS

Coldest region, the soil (suelo) is always frozen, no trees, only low (bajas) plants. Arctic fox, polar bear and caribou.

RAINFORESTS

Flat areas with grass and a few trees. Hot summer and cold winter. Grazing animals, buffaloes, coyotes and foxes.

TUNDRA

Hot, humid climate with a lot of rain all year. A lot different plants, animals, trees, shrubs, iguanas, monkeys and toucans.

MEDITERRANEAN FOREST

Humid regions with cool summers. Different types of trees, oaks, maple, and beech.

Ferns, mosses, squirrels, rabbits, owl, wolfs and bears.

DESERTS

Dry regions with warm summers. Trees are evergreen (pine trees and holm oak), shrubs (thyme and rosemary) squirrels, eagles, lynxes and rabbits.
