

SCIENCE REVIEW 9TH GRADE

ECOLOGY, LEVELS OF ORGANIZATION IN AN ENVIRONMENT. BIOMES, HABITAT AND NICHE

WRITE THE LETTER THAT MATCHES IN EACH BOX.

	HABITATS
A	Lives in deserts, woodlands, suburban communities, caves, and cities.
B	Lives in African savannah.
C	Lives mainly in temperate forests high in the mountains of southwest China.
D	Lives in open oceans, coastal waters that include bays and inlets, river basins, certain inland seas
E	It lives in forests, wetlands, grasslands, deserts, rainforests, and more. Some live in trees and where humans live, such as houses, farms, barns, gardens, etc.

	NICHES
A	They subsist almost entirely on bamboo. They must eat around 26 to 84 pounds of it every day.
B	Makes webs and eat insects.
C	They hunt at night and eat flying insects such as mosquitoes, beetles, and moths, many of which are considered pests. Came live in houses and buildings.
D	Lives in herds and catches antelopes to eat.
E	Swims and eats fish.
