

Producers, Consumers, and Decomposers

Identify which animals are producers, consumers, or decomposers.

Write producer, consumer, or decomposer for each animal.

Producers – living things that make their own food from sun, water and soil. Green plants are producers.

Consumers – a living thing that cannot make its own food. All animals are consumers, and they get their energy by eating food.

Decomposers – a living thing that gets its energy by breaking down dead plants and animals. The most common decomposers are fungi and bacteria.

1. orange tree - _____

2. strawberry - _____

3. rabbit - _____

4. bacteria - _____

5. mushroom - _____

6. wolf - _____

7. falcon - _____

8. bumblebee - _____

9. rose - _____

10. bluebird - _____

11. cat - _____

12. snake - _____

13. mountain lion - _____

14. grass - _____
