Read the text and answer the questions.

Frogs

Frogs are amphibians because they can live both in water and on land. First, the frogs spawn the future frogs. Frogs lay eggs in water. A tadpole hatches from an egg. The tadpole grows legs and it will soon turn into a froglet. The froglet's tail gets shorter and it soon turns into a frog.

1. - Number the life cycle in order

- _____ Tadpole
- _____ Frog
- _____ Spawn
- _____ Froglet

2.- Why are frogs amphibians?

Because they _____
