## Task 1

### Instructions

Match the word with the definition, and example.

Quotient	Number sentence	$\boxed{28} \div 4 = 7$
Dividend	Answer to a multiplication equation	$28 \div \boxed{4} = 7$
Factor	Answer to a division equation	$28 \div 4 = 7 \boxed{\phantom{0}}$
Equation	Repeated addition	$\boxed{4} \times \boxed{7} = 28$
Divide	A number that is multiplied to another number	$4 \times 7 = \boxed{28}$
Product	A number that is split into equal groups	$\boxed{4 \times 7 = 28}$ $\boxed{28 \div 4 = 7}$
Multiply	Splitting into equal groups	$7 + 7 + 7 + 7 = 28$
Divisor	Number of equal groups a dividend is split into	$28 - 7 - 7 - 7 - 7 = 0$
