

All Kinds of Vegetables!

There are many types of vegetable. Carrots, potatoes, parsnips, and radishes are all root vegetables. They are called root vegetables because they are the part of the plant that grows under the ground.

Other vegetables come from different parts of a plant. Celery is the stem. Beans and peas are seeds. Broccoli and cauliflowers are baby flowers that have not yet opened!

1. All vegetables come from the same part of the plant.
2. The "root vegetables" are the ones that grow under the ground
3. Broccoli is a seed.

Name these foods (use the words from the list)

- Cheese
- Cucumber
