

## **PON EL NÚMERO Y HAZ LAS SUMAS**

A visual addition problem. It consists of three boxes arranged horizontally. The first box contains two blue dots. The second box contains two blue dots, one positioned above the other. To the right of the second box is an equals sign (=). Below the first box is a long, empty rectangular box. Below the second box is another long, empty rectangular box. This layout is designed for children to draw the sum in the empty boxes.

A visual math problem using circles to represent addition. It consists of three boxes arranged horizontally. The first box contains two blue circles. The second box contains three blue circles. Between the first and second boxes is a plus sign (+). To the right of the second box is an equals sign (=). Following the equals sign are two empty boxes, one above the other, intended for the student to draw the sum of the two boxes.

A math problem using circles to represent numbers. The first box contains 2 circles. The second box contains 3 circles. The third box contains 1 empty box. The fourth box contains 1 empty box. The fifth box contains 1 empty box.
