

NURSE AVA

Hi, my name is Ava. I work at a vaccine clinic. I vaccinate people against COVID-19.

It's normal to feel emotional about the vaccine.

Some patients are excited and say thank you.

They are happy they can get the vaccine.

Some patients are scared of needles. They cry.

Some people are nervous. They are afraid of side effects.

I tell my patients, you may feel tired after the vaccine. It is a natural side effect.

Choose the best answer:
