  - d my lifetime, but you never know.
  - e the near future. Then everything will be fine.
  - f way off.
  - g wishful thinking.
  - h around the corner.

## Vocabulary 3

### The suffix *-able*

Write a word ending in *-able* in each gap to complete the text about preventing diseases.

Around the world many children become ill and die every year. Although some of the diseases they die from are (1) i\_\_\_\_\_, almost all of them could be prevented. Clean (2) d\_\_\_\_\_ water is the first step to eradicating many of these common diseases.

However, any supply needs to be (3) r\_\_\_\_\_ so that people know it will be there when they need it.

Fortunately, there are now many (4) r\_\_\_\_\_ organisations such as UNESCO, Oxfam and Médecins Sans Frontières working to help provide such things as clean water and (5) r\_\_\_\_\_ energy to communities around the world who still live in situations that most of us would find (6) i\_\_\_\_\_.
