

decompose - artificial - pollution - dioxide - air - water  
agricultural - oxygen - burning - factories

a. \_\_\_\_\_ happens when nature does not know how to  
b. \_\_\_\_\_ an element that was not introduced in the environment  
naturally. If we put in the environment c. \_\_\_\_\_ things like plastic,  
we pollute the environment. There are many types of pollution. First, there is  
d. \_\_\_\_\_ pollution. Some of the main sources of this kind of pollution  
are the e. \_\_\_\_\_ of fossil fuels and emissions of carbon f. \_\_\_\_\_  
from vehicles and g. \_\_\_\_\_. Then, there's h. \_\_\_\_\_ pollution.  
Sources of this kind of pollution include the waste from i. \_\_\_\_\_  
fields, industrial sites and urban areas. Additionally, if fertilizers get thrown  
into the sea, algae grows too much, which reduces the amount of available  
j. \_\_\_\_\_ for other species.
