- 5 Our planet would die if there **was** / **is** no ozone layer.

Reading

6 Read Cristina's blog post about how to reduce waste. Choose the correct answer.

Blog Search

Welcome to my blog. Today is all about cutting down on waste. Everything we do can affect our environment in a negative way, and let's not forget that moving to Mars is not a choice. Planet Earth is our home, so here's an easy way to remember what we can do: the three Rs, 'Reduce', 'Reuse' and 'Recycle'.

Reducing waste is probably the best action because if we didn't have waste, then we wouldn't have a problem. So how can you do this? For example, get loose fruit and vegetables at the supermarket instead of products which are packaged in plastic.

The second R is to reuse. Instead of throwing things into the rubbish bin, why don't you reuse them? For example, reuse plastic food containers, I have one with pens and pencils on my desk!

The third R is recycle. Recycling means making new products from waste. I've recently donated clothes that I loved as a kid but unfortunately don't fit me anymore. Maybe this can help children who have no clothes, and I clear out my wardrobe – everyone wins!

- 1 Cristina thinks _____.
 - a going to Mars is a good solution.
 - b we need to solve the problems on planet Earth.
- 2 The most efficient way to help our planet is by _____.
 - a reducing waste.
 - b recycling.
- 3 It's better to buy _____.
 - a food in packages.
 - b single pieces of fruit and vegetables you choose.
- 4 Cristina keeps a plastic container _____.
 - a on her desk.
 - b in her kitchen.
- 5 Cristina has given her clothes away because _____.
 - a they are too small.
 - b she doesn't like them.
