Can you imagine hearing high-quality sound without using headphones or speakers? This is possible with a new technology called SoundBeaming. It was __ (5) __ by an Israeli company, Noveto. The company's SoundBeamer 1.0 uses a camera to __ (6) __ the user and place ultrasonic waves just outside a person's ears, where small pockets of sound are formed. SoundBeamer 1.0 also uses 3-D sensors that track __ (7) __ and follow the listener's ears. That means sound will follow you if you walk around. Listeners can even choose to step out of the beam's path to __ (8) __ the sound to stop. SoundBeaming is ready to change the way we listen to music, play video games, and join group video calls. The __ (9) __ technology is straight out of a science-fiction film. 5. (C) 6. (D) 7. (E) 8. (A) 9. (B)

Google officially opened a new office in Banqiao in January. It is one of the largest development centers outside the USA. Google, which has been in Taiwan for 15 years, currently employs around 2,000 people in the country. It announced that it will hire several hundred more, with a focus on women. It will also offer on-the-job training programs for people studying at local colleges. This will allow them to experience a high-tech working environment. These people will be chosen through online interviews by the end of the year. The Banqiao building features a gym, a massage room, and a game room. There is also a rest area and a cafeteria for workers to enjoy.

(B) 10. What will Google do in the future, according to its announcement?

(A) It will bring 2,000 workers to Taiwan. (B) It will hire more female talent.

(C) It will elect a new president. (D) It will build a technology university.

(A) 11. What do we know about Google in Taiwan?

(A) It has been here for over a decade. (B) It is moving development teams down south.

(C) It will close some smaller offices. (D) It is struggling to find good engineers.

(A) 12. What will Google do by the end of 2021?

(A) It will select students for positions. (B) It will build more offices in Banqiao.

(C) It will design a university course. (D) It will close its cafeteria for health reasons.
