How to Write a Biography! (In 6 Easy Steps)

Thomas Edison was one of the most important inventors in history. He was born in Ohio, USA, in 1847. He was a very curious child, he had problems at school and then he started to be educated at home by his mother, a former teacher. Thomas was left partially deaf at the age of 12 from a disease.

Date: _____

This person is worthy of emulation not only because of his inventions but also for his determination in making as convenient as possible. Today we enjoy the product of his curiosity, intelligence and hard work which we should always be thankful for.

He performed his first experiments in his parents' cellar. At the age of 22 he moved to New York and started selling his first inventions. With this money, he created his laboratory in Menlo Park. There he patented more important discoveries: the phonograph, the new telegraph system, a very important version of a light bulb, the kinoscope, etc.

Thomas Edison: The Wizard of Menlo Park

"I never did a day's work in my life; it was all fun." This was one of the famous quotes from Thomas Edison who has patented more than 1,000 inventions. One of which is the very successful incandescent lightbulb.
