

1. Complete the text using the words in the box:

reduce - nuclear - reuse - natural resources - acid rain
- public transport - energy sources - showers - transferred
run out - recycle - transported - thermal - global warming - negative

There are many different forms of energy: chemical, light, [redacted],

mechanical, [redacted] and electrical. Energy can be transformed, [redacted], stored and [redacted].

Energy sources are the [redacted] from which we obtain energy. In general, energy needs to be transformed in order to be used.

[redacted] can be renewable or non – renewable. Renewable energy sources are continuously replenished . Non-renewable energy sources will [redacted] one day.

Energy use has some [redacted] consequences, such as limited resources, [redacted], radioactive waste and [redacted].

Ways we can save energy include using [redacted], taking [redacted], and practicing the three Rs: [redacted], [redacted] and [redacted]

2. Tick the correct form of energy.

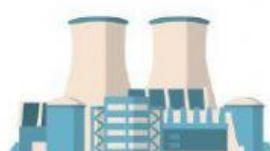

- a. Chemical energy.
- b. Electrical energy
- c. Nuclear energy.

- a. Thermal energy.
- b. Mechanical energy
- c. Light energy

- a. Light energy.
- b. Mechanical energy
- c. Thermal energy.

- a. Chemical energy
- b. Nuclear energy
- c. Electrical energy.

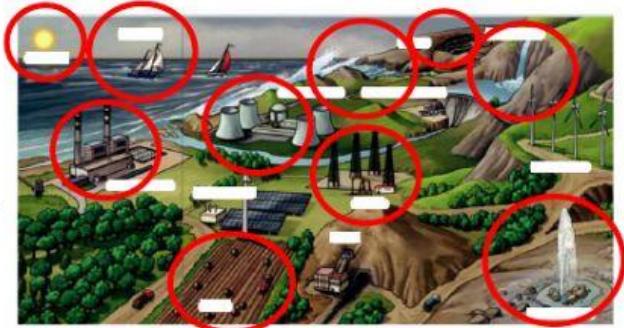

- a. Electrical energy
- b. Light energy
- c. Chemical energy

- a. Nuclear energy
- b. Chemical energy
- c. Mechanical energy

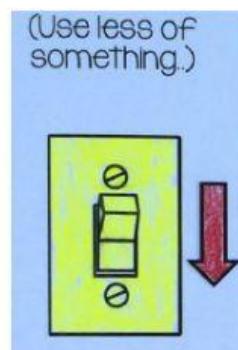

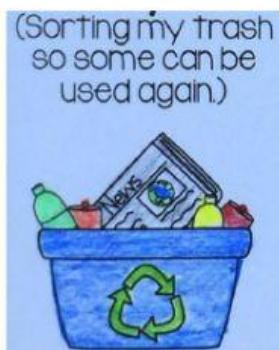

3. Find 10 words related with energy sources.

ENERGY SOURCES

K	B	S	X	B	W	I	N	D	C	X	X	O	H
